DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 20 April 2021 at 01:54 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to be Low for much of the UK, particularly in Scotland and Northern Ireland. However, settled weather and light winds in parts of England and Wales may mean that locally-generated pollutants fail to disperse, giving areas of Moderate air pollution.

Tomorrow: Air pollution levels should be Low across the majority of the UK, with parts of southwestern Britain perhaps most likely to see local Moderate levels.

Outlook: Air pollution levels should remain generally Low through this period, perhaps locally Moderate.
